CHILD LABOR INCREASING
IN SPITE OF OPPOSITION.More Than One-Fourth of the Boys
and One-Tenth of the Girls
Are Breadwinners.WASHINGTON, Sept. 10.—The Census Office
has just published data which makes it
clear that there is a marked increase in
the employment of children.A breadwinner is to be found in every
fifth child between the ages of 10 and 15
years in the United States. Of these ju-
venile wage earners every third child is a
girl.Child labor is increasing, in spite of
opposition of trade and labor unions and
societies organized to combat the evil.In 1900 the number of children between
10 and 15 years old employed in gainful oc-
cupation was 1,700,000, or 12.2 per cent of
all children in the United States. Prac-
tically every fifth child between those ages
was a wage earner. Statistics for 1900
show that the number of children between
10 and 15 years of age then employed was
1,118,350, or 16.8 per cent of the entire child
population of the country.The percentage of children between 10
and 15 years old gainfully employed is as
follows: Eleven years old, 9.1 per cent;12 years old, 12.7 per cent; 13 years old,
15.3 per cent; 14 years old, 23.2 per cent;
15 years old, 21.4 per cent.Boys predominate among the employed
children. Of all the boys in the United
States 28.1 per cent are employed. The
percentage of girls between 10 and 15 years
old employed is 10.2.Of the male children at work 54 per cent
are native whites, of native parents; 15.9
per cent native whites of foreign parents;
4.6 per cent foreign whites and 25.2 per
cent negroes.

CHIEF BUYS HIS OWN COFFIN.

Citizens Startled by Explosion
Blowing Indian to Fragments.Vancouver, British Columbia, Sept. 10.—
An Indian chief at Bella Bella, sent down
to a local firm on a short time ago an order
for a coffin. From another firm he or-
dered a keg of gunpowder. The keg of
powder was taken into the chief's house
and carefully placed under the chief's
bed.During the night the inhabitants of the
village were startled by a terrific explo-
sion and, rushing out, they found the
chief's house had been blown to atoms.
Small fragments of the body of the chief
were found in the debris. It is thought to
have been a case of suicide.NEW METHOD INVENTED
FOR MAKING ARMOR PLATE.Process Worked Out by Two Young
Chemists, It Is Said, May Reduce
Cost to \$100 a Ton.REPUBLIC SPECIAL.
Philadelphia, Sept. 10.—While it has long
been the policy of the Midvale Steel Com-
pany not to take the public into its confi-
dence, it is stated that the company now
has control of a new process of making
armor plate at a cost very much below
that of the Harvey or Krupp methods used
by concerns now furnishing plates to the
Government for warships.This process is said to be the invention
of two of the company's employees, who
have been at work on the problem for fif-teen years. It is asserted that under the
new method armor plate can be made at
a profit at \$100 a ton, while under con-
tracts now in force
